Battery

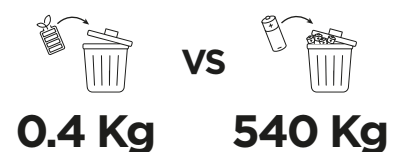

The Megamini E-Control range of advanced Celtex electronic dispensers is designed to deliver a **more hygienic** bathroom experience.

The 100% **hands-free** solution means users do not touch the dispenser, but only the product they will use.

Featuring a modern, functional Made in German design, the E-Control range offers outstanding efficiency, maximum hygiene and **reduced waste**.

The innovative technology is based around a **rechargeable battery** that produces significantly **less landfill**, making E-Control a **smarter choice for both businesses and the environment**.

One charger, two ways to use it

Discover how the rechargeable battery works with the dispenser in this short **video**

E-CONTROL HAND TOWEL DISPENSER

The E-Control hand towel dispenser combines **innovative no-touch** technology with an **intelligent stub roll** system that ensures an **uninterrupted supply of paper** and **zero waste**.

When a roll has almost run out, it is transferred to a secondary casing inside the dispenser. The new, full roll is placed in the main compartment on standby until the first roll is completely finished.

What's more, with the semi-transparent window, it is easy to **monitor paper levels**, meaning reduced maintenance time and costs.

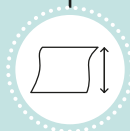

HYGIENIC NO-TOUCH SHEET-BY-SHEET DISPENSING

Because one sheet is dispensed at a time, you only touch the paper you use.

ZERO WASTAGE

The intelligent stub roll transfer solution means every sheet of every roll is used and users never find themselves without paper.

ADJUSTABLE TEAR INTERVALS

The length of each sheet dispensed can be set between 15 and 80 cm.

ADJUSTABLE DISPENSING INTERVALS

Select the interval between each sheet being dispensed, from 0.5 to 5 seconds.

E-CONTROL FOAM SOAP

The Celtex E-Control dispenser can be used for up to **1000 handwashes**, transforming a soap concentrate into a luxurious soft foam.

Not only offering extended maintenance and refill intervals, cost-effective doses and reduced usage, its no-touch technology **minimises cross-contamination** and optimises hygiene.

MAXIMUM HYGIENE

With the no-touch system, users have no need to come into contact with the dispenser.

CONTROLLED DOSAGE

Dispensing single doses of 0.8 ml of soap means reduced costs, less waste and longer intervals between refills.

DELICATE ON THE SKIN

The soft luxurious foam contains ingredients that nourish the skin.

E-CONTROL TOILET SEAT CLEANER

Never has providing clean, safe public bathroom facilities been so important.

Megamini Seat Cleaner is a **no-touch** detergent dispenser that allows users to clean the toilet seat before sitting down and **eliminates cross-contamination**.

This is a modern day must-have accessory that ensures adults and children alike can enjoy peace of mind when they use a public bathroom.

SUPERIOR HYGIENE

Perfect for cleaning toilet seats and surrounding surfaces.

ALCOHOL BASE

Formulated to dissolve stubborn organic components.

GENTLE ON THE SKIN

To be used with paper towel, but if it does come into contact with skin, it is surprisingly gentle.

CONTROLLED DOSAGE

Each dose is 1 ml, delivering 800 doses.
