PROFIX

Highly **specialised**
technical wipes

ADVANCED TECHNOLOGY CLOTHS

The background features large, semi-transparent, light blue letters 'O' and 'F' that form the word 'OF'. The 'O' is on the left and the 'F' is on the right, both rendered in a clean, sans-serif font. The 'O' has a horizontal line extending from its left side, and the 'F' has a horizontal line extending from its top right.

TECHNICAL CLOTHS

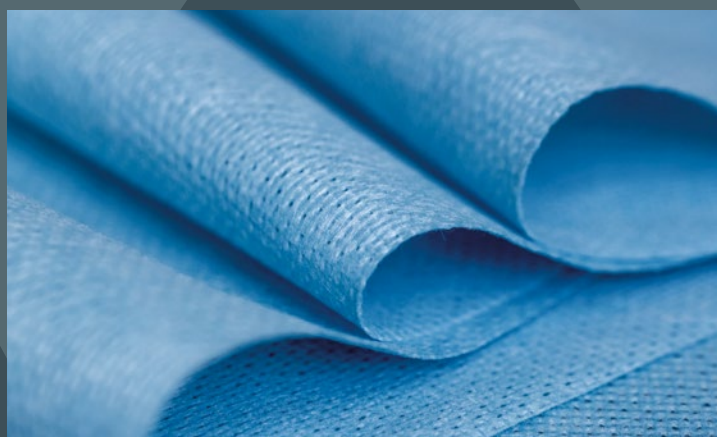

ABSORPTION, RESISTANCE, SOFTNESS THE IDEAL SOLUTION FOR A FLAWLESS PERFORMANCE

The Profix range of rolls and cloths is so diverse to meet the needs of a wide variety of work contexts.

With their exceptionally **fast absorbency capacity** and great resistance to solvents, Profix products do not tear easily and are strong enough to absorb oil and **withstand wear heavy usage**.

The **lint-free** feature also makes them ideal for polishing and finishing operations. Profix multipurpose wipes, practical for many types of tasks, **minimise waste as they provide the right product for each job**.

DESIGNED TO MAKE A DIFFERENCE

A SPECIAL RANGE DESIGNED FOR PROFESSIONAL CONTEXTS

Available in a selection of weights and formats and in a choice of smooth or apertured finishes, the Profix range of products is **ultra-absorbent and resistant** yet **soft**, making it a versatile, smart solution.

Profix wipes can be used in multiple areas, precisely because of the different materials they are made of, ranging from contexts where care and precision are required, to others where grease or heavy grime must be removed.

PROFIX

The **tough** cloth with
a **sensitive** side

GENTLE STRENGTH FOR FLAWLESS SURFACES

Thanks to the material they are made of, Airlaid, **Profix Super cloths** grant better performances, similar to a fabric cloth. The special manufacturing of cellulose fibres, in dry conditions, gives the paper extremely high qualities: good resistance, even when wet, **great absorption** and **versatility of use**. Available in different grammages to suit a variety of applications.

Water absorption

Absorbs until 6 times its own weight

Really fast water absorption

FEATURES

- › Made of DRC, Double Re-Creped Cellulose. The double creping of cellulose enhances the features of resistance, absorption and softness of the cloth.
- › Fast absorption of liquids and oily fluids.
- › Suitable for drying sensitive surfaces such as stainless steel and glass, without leaving any residues.
- › Soft and rubbing resistant.
- › Ideal for drying bedridden patients in hospitals or nursing homes, thanks to its high softness degree combined with its absorption power.
