DISPENSER SYSTEMS

THE PERFECT
BALANCE OF
FUNCTION AND FORM

**Striking the right balance does
not mean compromise**, but is
about developing the aesthetic
side of functionality.

MEGAMINI DISPENSING SYSTEMS: **DESIGN, PERFORMANCE AND SUSTAINABILITY**

Efficiency, maximum hygiene and waste reduction come together through an exclusive Made in Italy design to create solutions that respect the environment and lower costs.

What's more, clients understand and enjoy **the advantages** of Megamini products, **leading to loyalty and long-term sales.**

GUARANTEED
QUALITY

RESPECT FOR
THE ENVIRONMENT

DISPENSER + DISPOSABLE

All the Megamini dispensers hold PEFC- and EU Ecolabel-certified paper that has been dermatologically tested.

WHERE AESTHETICS AND PERFORMANCE MEET

Designed in 2010, the 100% **Made in Italy** dispensers are inspired by the sleek shapes and volumes of the Rationalism school of design. The result is a contemporary aesthetic and an **exceptional level of functionality** derived from the design's **linear form**. A unique design that transforms a practical dispenser into an **eye-pleasing bathroom accessory**.

MADE IN ITALY
DESIGN

IDEAL FOR
ANY SETTING

MINIMALIST
AESTHETIC

THE AESTHETICS OF PERFECTION

The proportions of the Vitruvian man and the minimalism of Bauhaus architects come together for a design finished product. Straight and geometric, squared, not rounded shapes become inspiration both for the design and the technology of the item.

CONTROLLED
DISPENSING

REDUCED
CONSUMPTION

INGENUOUS
SOLUTIONS

MEGA PERFORMANCE MINIMAL WASTAGE

The Celtex Megamini E-Control range features advanced electronic technology with a **no-touch** mechanism that avoids cross-contamination and delivers maximum bathroom hygiene. Thanks to **electronic sensors** that are triggered by hand movement, users **only come into contact with the product dispensed** for their own use without having to touch the dispenser at all. In short, a 100% **hands-free experience**.

Maximum
hygiene

No-touch
dispensing

Rechargeable
battery

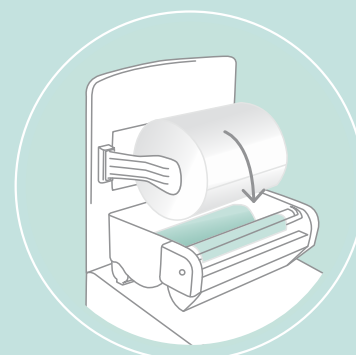

STUB ROLL MECHANISM

The “**stub roll**” mechanism ensures constant supply, meaning not a single hand towel is wasted. When a roll has almost run out, it is transferred to a **secondary casing**, and continues to be used, giving place to a new full roll in the main compartment. This hand towel roll **will start to be used only when the old roll is completely finished**.

PROTECTED SYSTEM

Each roll is equipped with a **microchip associated to the dispenser**. When the roll is used up, the microchip no longer functions. To restart the operation of the dispenser, install the new roll equipped with a new functioning chip.

E-CONTROL RECHARGEABLE BATTERY KIT

Using lithium iron phosphate technology, E-Control batteries are not subject to the so-called “memory effect”. To maintain initial performance, other batteries need to be drained completely before being fully recharged. This is not the case with E-Control, meaning that it will always retain **100% nominal capacity**, so there is no need to wait until it gets to zero before charging.

LONG-LIFE BATTERY

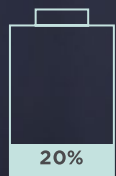

NO MEMORY EFFECT

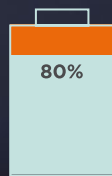

CAN BE RECHARGED OVER 2,000 TIMES

RECHARGEABLE BATTERIES SUBJECT TO MEMORY EFFECT

Battery level

After charging

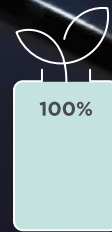

A standard battery with 20% remaining capacity will **only return to 80%** of its potential capacity when it's charged.

VS

E-CONTROL RECHARGEABLE BATTERY

Battery level

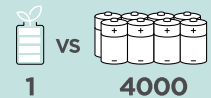

After charging

An E-Control battery with 20% remaining capacity will **return to 100% of its potential capacity** when it's charged.

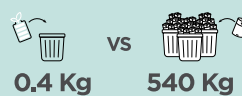

THANKS TO THE E-CONTROL RECHARGEABLE BATTERY POWER SUPPLY, THE WASTE RELEASED INTO THE ENVIRONMENT IS DRASTICALLY REDUCED.

RECHARGE WHENEVER POSSIBLE

To ensure optimal performance and prolong battery life, it is important to **avoid deep discharge** by regularly recharging.

LOW ENERGETIC ABSORPTION

The battery charger comes with a classic europlug indicating its **low energy credentials**.

FORMATIC

CONTROLLED, MANUAL DISPENSING ACTION

Megamini Formatic is the ideal system for bathrooms and kitchens.

Formatic Hand Towel is a manual hand towel roll dispensing solution with an **automatic cutting mechanism** that delivers sheets of high-quality paper measuring 23 cm in length. The smart design makes it easy for users to extract paper, with only two sheets required to ensure hands are thoroughly dried.

The **Formatic Foam manual soap dispensing** system reduces waste and usage by delivering 0.4 ml of foam every time, for a total of 2,250 doses.

Optimised consumption and reduced wastage.

STRONG PROTECTION, SMART DISPENSING

Controlled quantity

Protected roll

Reduced wastage

Quality guaranteed

FORMATIC HAND TOWEL

- ▶ Ideal for high-traffic contexts.
- ▶ Easy extraction with just a light tug needed.
- ▶ Semi-transparent window makes it easy to see when paper is running low.
- ▶ Roll adaptor made from recycled, recyclable plastic.

Fast and simple to refill

Monitored usage

Up to 1250 sheets

FORMATIC FOAM SOAP

- ▶ Product dispenses soft foam soap.
- ▶ Semi-transparent window makes it easy to check liquid level.
- ▶ The cartridge automatically collapses as its contents are used, creating less rubbish to dispose of with your plastic waste.

LESS PLASTIC IN CARTRIDGES, MORE RESPECT FOR THE ENVIRONMENT

Soap cartridges have been upgraded with a new bottle composition. New cartridges contain around **40% less plastic**, reducing their environmental footprint, also in terms of waste produced. This upgrade makes the **package even more elastic and flexible**, thus optimizing their self-collapsing feature.

REVOLVER

THE REVOLUTIONARY REVOLVER+MAGNUM TOILET PAPER DISPENSER SYSTEM

The Revolver dispenser **holds three rolls of toilet paper** which are anchored by a central cog. When a roll is finished, the force of gravity rotates the cog and **positions the next roll in its place**, ready to be used.

CERTIFICATIONS HIGH-PERFORMING WHILE RESPECTING THE ENVIRONMENT

RESPECT FOR FORESTS

PEFC certification guarantees on the origin of forest and wood-based products originating from sustainably managed forests, recycled material and/or PEFC-controlled sources.

REDUCED ENVIRONMENTAL IMPACT THROUGHOUT ITS LIFE CYCLE

EU Ecolabel guarantees that products, throughout their entire life cycle, meet specific environmental performance criteria, common to all European Union countries: low levels of water pollution, greenhouse gas emissions and electricity usage.

100% RECYCLABLE

Dispensers are made of materials that are up to 100% recyclable. A choice that helps reduce environmental impact and protects the planet.
